November is National Epilepsy Awareness Month. Epilepsy is a brain disorder characterized by recurrent seizures of many different types that affect an estimated 2.9 million people in the US. Not all seizures are emergencies, and most will end within a few minutes. The first response to witnessing a seizure should be to remain calm and provide care, safety and comfort. If a seizure causes injury, lasts more than 5 minutes, causes a person to have difficulty breathing or walking after the seizure is over, or occurs in a person with another known medical condition, call 911.
